Lab 7: Form Processing using Django – Part I

Home Assignments

urls.py (common):

```
"""
```

URL configuration for myproject project.

The `urlpatterns` list routes URLs to views. For more information please see:

<https://docs.djangoproject.com/en/5.2/topics/http/urls/>

Examples:

Function views

1. Add an import: from my_app import views
2. Add a URL to urlpatterns: path("", views.home, name='home')

Class-based views

1. Add an import: from other_app.views import Home
2. Add a URL to urlpatterns: path("", Home.as_view(), name='home')

Including another URLconf

1. Import the include() function: from django.urls import include, path
2. Add a URL to urlpatterns: path('blog/', include('blog.urls'))

```
"""
```

```
from django.contrib import admin
```

```
from django.urls import path, include
```

```
urlpatterns = [  
    path('groceryform/', include('groceryform.urls')),  
    path('studentform/', include('studentform.urls')),  
    path('carform/', include('carform.urls')),  
    path('formex/', include('formex.urls')),  
    path('admin/', admin.site.urls),  
    path('webapp/', include('webapp.urls')),  
    path('formapp/', include('formapp.urls')),  
    path('ex1app/', include('ex1app.urls')),  
    path('ex2app/', include('ex2app.urls')),  
    path('homeex1app/', include('homeex1app.urls')),  
    path('basic_calc/', include('basic_calc.urls')),  
    path('magazine/', include('magazine.urls')),  
    path('book/', include('book.urls')),  
    path('label/', include('label.urls')),  
]
```

- 1) Develop a Web Application for Grocery Checklist Generation as shown in the figure below. It must have **checkboxes** which must be populated on page load listing grocery items. On clicking the **Add Item** button the selected Items and their prices have to be displayed in a Table. Set the borderstyle and border width for the table and its cells.

Select Item:

☒ Wheat
☐ Jaggery
☒ Dal

Item Name	Item Price
Wheat	40
Dal	80

Add Item

forms.py:

```
from django import forms
```

```
class GroceryForm(forms.Form):
```

```
    ITEM_CHOICES = [  
        ('Wheat', 'Wheat'),  
        ('Jaggery', 'Jaggery'),  
        ('Dal', 'Dal'),  
    ]
```

```
    items = forms.MultipleChoiceField(  
        choices=ITEM_CHOICES,  
        widget=forms.CheckboxSelectMultiple,  
        label="Select Item:"  
    )
```

views.py:

```
from django.shortcuts import render
```

```
# Create your views here.
```

```
from .forms import GroceryForm
```

```
def grocery_view(request):
```

```
    prices = {
```

```
        'Wheat': 40,
```

```
        'Jaggery': 60,
```

```
        'Dal': 80,
```

```
    }
```

```
    selected_items = []
```

```
    if request.method == "POST":
```

```
        form = GroceryForm(request.POST)
```

```
        if form.is_valid():
```

```
            items = form.cleaned_data['items']
```

```
            for item in items:
```

```
                selected_items.append({
```

```
                    'name': item,
```

```
                    'price': prices[item]
```

```
                })
```

```
        else:
```

```
            form = GroceryForm()
```

```
    return render(request, "grocery.html", {
```

```
        'form': form,
```

```
        'selected_items': selected_items
```

```
    })
```

urls.py:

```
from django.urls import path

from . import views

urlpatterns = [

    path("", views.grocery_view, name='grocery'),

]
```

grocery.html:

```
<!DOCTYPE html>

<html>

<head>

    <title>Grocery Checklist</title>

</head>

<body>

<form method="POST">

    {% csrf_token %}

    {{ form.as_p }}

    {% if selected_items %}

<table border="1" cellspacing="3">

    <tr>

        <th>Item Name</th>

        <th>Item Price</th>

    </tr>

    {% for item in selected_items %}

    <tr>

        <td>{{ item.name }}</td>
```

```
        <td>{{ item.price }}</td>

    </tr>

{% endfor %}

</table>

{% endif %}

<br>

<input type="submit" value="Add Item">

</form>

</body>

</html>
```

output:

Grocery Checklist

Select Item:

☒ Wheat
☐ Jaggery
☒ Dal

Item Name	Item Price
Wheat	40
Dal	80

Add Item

Select Item:

- ☒ Wheat
- ☒ Jaggery
- ☐ Dal

Item Name	Item Price
Wheat	40
Jaggery	60

Add Item
