CSE C2 Roll No. 37

WP Lab 2

Lab Assignments:

1. Write a web page which contains table with 3 X 3 dimensions (fill some data) and one image. Style the rows with alternate color. Move the table and image together from right to left when button is clicked.

code:

```
<html>
<head>
  <title>Table and Image Move</title>

  <script src="../jquery-3.7.1.min.js"></script>

  <style>
    table {
      border-collapse: collapse;
      width: 300px;
    }

    table, th, td {
      border: 1px solid black;
      padding: 10px;
      text-align: center;
    }

    tr:nth-child(even) {
      background-color: #d9ead3;
    }
  </style>
</head>
<body>
  <div>
    <table border="1">
      <tr><td>1</td><td>2</td><td>3</td></tr>
      <tr><td>4</td><td>5</td><td>6</td></tr>
      <tr><td>7</td><td>8</td><td>9</td></tr>
    </table>
    <img alt="A 3x3 grid of colored squares." data-bbox="100 400 250 550"/>
    <button>Move</button>
  </div>
</body>
</html>
```

```
tr:nth-child(odd) {  
    background-color: #fce5cd;  
}
```

```
#container {  
    position: relative;  
    left: 500px;  
    display: inline-block;  
}
```

```
img {  
    width: 150px;  
    display: block;  
    margin-top: 20px;  
}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<button id="moveBtn">Move Left</button>
```

```
<br><br>
```

```
<div id="container">
```

```
<table>
```

```
<tr>
```

```
<td>1</td>
```

```
<td>2</td>
```

```
<td>3</td>
```

```
</tr>
```

```
<tr>
  <td>4</td>
  <td>5</td>
  <td>6</td>
</tr>
<tr>
  <td>7</td>
  <td>8</td>
  <td>9</td>
</tr>
</table>
```

```

</div>
```

```
<script>
$(function () {
  $("#moveBtn").click(function () {
    $("#container").animate({ left: "0px" }, 1000);
  });
});
</script>
```

```
</body>
</html>
```

output:

before:

Table and Image Move

file:///wsl.localhost/Ubuntu/home/butter/codes/230905232/WP-Lab/lab02-JQuery/1.html

Move Left

1	2	3
4	5	6
7	8	9

after:

Table and Image Move

file:///wsl.localhost/Ubuntu/home/butter/codes/230905232/WP-Lab/lab02-JQuery/1.html

Move Left

1	2	3
4	5	6
7	8	9

2. Design a calculator to perform basic arithmetic operations. Use textboxes and buttons to design web page.

code:

```
<html>

<head>

  <title>Calculator</title>

  <script src="../jquery-3.7.1.min.js"></script>

  <style>
    input[type="text"] {
      width: 150px;
      height: 30px;
      margin: 5px;
      text-align: right;
    }

    button {
      width: 50px;
      height: 40px;
      margin: 5px;
      font-size: 18px;
    }
  </style>
</head>

<body>

  <input type="text" id="num1">
  <input type="text" id="num2">
  <br>
```

```
<input type="text" id="result" readonly>
```

```
<br><br>
```

```
<button id="add">+</button>
```

```
<button id="sub">-</button>
```

```
<button id="mul">*</button>
```

```
<button id="div">/</button>
```

```
<script>
```

```
$(function () {
```

```
    $("#add").click(function () {
```

```
        let a = parseFloat($("#num1").val());
```

```
        let b = parseFloat($("#num2").val());
```

```
        $("#result").val(a + b);
```

```
    });
```

```
    $("#sub").click(function () {
```

```
        let a = parseFloat($("#num1").val());
```

```
        let b = parseFloat($("#num2").val());
```

```
        $("#result").val(a - b);
```

```
    });
```

```
    $("#mul").click(function () {
```

```
        let a = parseFloat($("#num1").val());
```

```
        let b = parseFloat($("#num2").val());
```

```
        $("#result").val(a * b);
```

```
    });
```

```
    $("#div").click(function () {
```

```
        let a = parseFloat($("#num1").val());
```

```
        let b = parseFloat($("#num2").val());
```

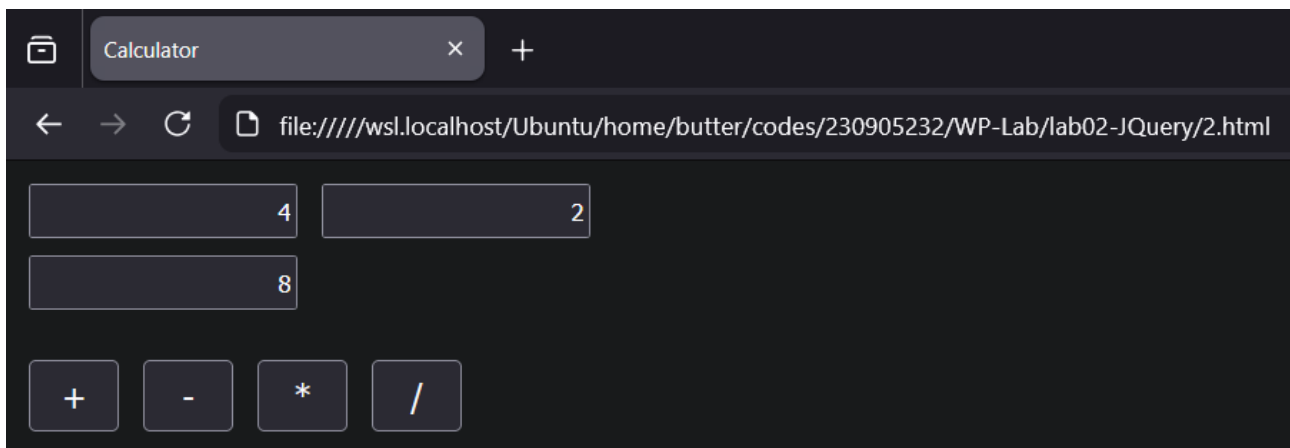

```
$("#result").val(a / b);  
});
```

```
});  
</script>
```

```
</body>  
</html>
```

output:

(multiplication)

3. Create a web page to design a birthday card shown below

code:

```
<html>
```

```
<head>
```

```
<title>Birthday Card</title>
```

```
<script src="../jquery-3.7.1.min.js"></script>
```

```
<style>
```

```
body {
```

```
    font-family: Arial;
```

```
    background-color: #FFFEE0;
```

```
}
```

```
#main {
```

```
    display: flex;
```

```
    gap: 20px;
```

```
}
```

```
#controls {  
    width: 300px;  
}
```

```
#card {  
    width: 400px;  
    height: 500px;  
    border: 4px solid black;  
    text-align: center;  
}
```

```
#card img {  
    width: 200px;  
    margin-top: 100px;  
}
```

```
#greeting {  
    margin-left: 100px;  
    margin-right: 100px;  
}
```

```
select,  
input[type="text"],  
textarea {  
    width: 100%;  
    margin-bottom: 10px;  
}
```

```
input[type="radio"],  
input[type="checkbox"] {  
    width: auto;  
    margin-right: 5px;  
}
```

```
}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<div id="main">
```

```
<div id="controls">
```

Choose a background color:

```
<select id="bgcolor">
```

```
<option value="yellow">Yellow</option>
```

```
<option value="pink">Pink</option>
```

```
<option value="lightblue">Light Blue</option>
```

```
</select>
```

Choose a font:

```
<select id="font">
```

```
<option value="Verdana">Verdana</option>
```

```
<option value="Arial">Arial</option>
```

```
<option value="Times New Roman">Times New Roman</option>
```

```
</select>
```

Specify a numeric font size:

```
<input type="text" id="fontsize" value="25">
```

Choose a border style:

```
<input type="radio" name="border" value="none" checked> None <br>
```

```
<input type="radio" name="border" value="double"> Double <br>
```

```
<input type="radio" name="border" value="solid"> Solid <br>
```

```
<br>
```

```
<input type="checkbox" id="picture" checked> Add the Default Picture  
<br><br>
```

Enter the greeting text below:

```
<textarea id="message">Happy Birthday, and many more</textarea>
```

```
<br>
```

```
<button id="update">Update</button>
```

```
</div>
```

```
<div id="card">
```

```
  <h1 id="greeting">Happy Birthday, and many more</h1>
```

```
  
```

```
</div>
```

```
</div>
```

```
<script>
```

```
$(function () {
```

```
  $("#update").click(function () {
```

```
    $("#card").css("background-color", $("#bgcolor").val());
```

```
    $("#greeting").css("font-family", $("#font").val());
```

```
    $("#greeting").css("font-size", $("#fontsize").val() + "px");
```

```
    let b = $("input[name='border']:checked").val();
```

```
    if (b === "none") $("#card").css("border", "none");
```

```
    if (b === "solid") $("#card").css("border", "4px solid black");
```

```
    if (b === "double") $("#card").css("border", "4px double black");
```

```
$("#greeting").text($("#message").val());
```

```
if ($("#picture").is(":checked")) {
```

```
    $("#cake").show();
```

```
} else {
```

```
    $("#cake").hide();
```

```
}
```

```
});
```

```
});
```

```
</script>
```

```
</body>
```

```
</html>
```

output:
